

Tolcylen® Transdermal CBG / CBD Cream

Tolcylen® Transdermal CBG / CBD Cream is a physician-dispensed topical cream designed for **pain and inflammation relief** in the feet, ankles, and legs. It combines **CBD (cannabidiol)** and **CBG (cannabigerol)** with a patented transdermal delivery system that helps the cream penetrate deeper into the skin than typical over-the-counter cannabinoid creams. The result: targeted relief and healthier skin.

How It Works

- **Deep Penetration:** Special Tolcylen delivery system allows CBD and CBG to pass through skin layers for better results.
- **CBD:** Helps calm overactive nerves and reduce pain signals.
- **CBG:** Strong anti-inflammatory effects to reduce swelling and stiffness.
- **Combined Effect:** Broader pain relief than CBD alone, plus a soothing, moisturizing base.

Why Tolcylen® is Different

- **Physician-grade quality:** Available only through medical professionals.
- **Higher strength:** Up to 6,000 mg cannabinoids per bottle.
- **Certified safe:** THC-free, third-party lab tested.
- **Stable & effective:** Non-greasy cream that stays potent for years without separating or losing quality.

Common Uses

- Foot and ankle pain from long hours or overuse
- Heel pain and plantar fasciitis
- Arthritis-related discomfort
- Mild neuropathic pain
- General muscle soreness or inflammation

How to Use

1. Wash and dry the area.
2. Apply **3–4 pumps** to the painful area.
3. Massage gently for about 60 seconds until absorbed.

4. Use **3 times daily for the first week**, then taper to **once daily** as pain improves.
5. Always wash hands after applying.

Safety & Tips

- For **external use only**.
- Do not apply to open wounds or broken skin.
- If irritation occurs, stop use and contact your provider.
- Store at room temperature, away from sunlight.
- Keep out of reach of children and pets.

Summary:

Tolcylen® CBG / CBD Cream uses a unique delivery system to provide **targeted, effective pain relief** right where you need it. With its dual cannabinoids, physician-grade quality, and skin-friendly formula, it offers safe and effective support for foot, ankle, and leg discomfort.
