

Treating Fungal Toenails with Tolcylen®

Fungal toenails (onychomycosis) are stubborn and require a comprehensive approach. The Tolcylen® product line is designed specifically by podiatric specialists to target fungus while also supporting nail and skin health. These products stand out from other over-the-counter options because of their medical-grade formulations and patented delivery systems, available only through physicians.

Tolcylen® Antifungal / Nail Renewal Solution

Why Tolcylen?

- Contains both *antifungal medication* and *keratolytic agents* (urea, lactic acid, propylene glycol) to thin and soften nails, making them more penetrable.
- *Patented ultra-low surface tension delivery vehicle* ensures medication penetrates deep into nail layers where fungus hides.
- Also contains *moisturizers and conditioners* to improve nail appearance while treating fungus.

Instructions:

1. Wash and dry feet thoroughly.
2. Apply a thin layer to affected nails (surface, edges, cuticle).
3. Let dry before socks/shoes.
4. Use daily for several months or as prescribed.

Tolcylen® Therapeutic Foot Soak Solution

Why Tolcylen?

- Specially formulated with *antifungal and deodorizing agents* to reduce surface fungus and odor.
- Contains *skin-conditioning ingredients* that soothe irritation and support skin barrier health.
- Softens thickened nails and calluses, boosting the effectiveness of topical treatments applied afterwards.

Instructions:

1. Mix recommended amount in warm water.
2. Soak feet 10–15 minutes.
3. Dry feet completely, especially between toes.

4. Apply Nail Solution after soaking.
5. Use daily or as recommended.

Tolcylen® Antimicrobial Shoe Spray

Why Tolcylen?

- Medical-strength *antifungal and antibacterial agents* target shoe environments more effectively than standard sprays.
- Reduces fungal spores, bacteria, and odor-causing organisms.
- Prevents reinfection, which is a common reason fungal nail treatments fail.

Instructions:

1. Spray inside shoes after each wear.
2. Let shoes air dry fully before re-wearing.
3. Rotate shoes when possible.

How They Work Together:

- The **Nail Renewal Solution** penetrates nails with a patented delivery system to kill fungus and restore nail health.
- The **Foot Soak** reduces surface fungus, softens nails, and enhances comfort.
- The **Shoe Spray** disinfects footwear to stop reinfection.

Tolcylen® products are available only through foot and ankle specialists, offering a higher level of care than typical over-the-counter options. With consistency, you can expect steady progress as your nails grow out healthy over 6–12 months.
