

# SCULPT YOUR BODY FROM HEAD TO TOE

**pelleFirm™**  
RF BODY TREATMENT SYSTEM

Do you  
**exercise**  
and **eat** well...

...but still struggle with certain cellulite-prone body problem zones? Address those areas **quickly** and **effectively without surgery, pain or downtime** - with the **PelleFirm™ RF Body Treatment System**. After just a few treatments you may start to **experience a temporary reduction** in the **appearance** of cellulite and an **overall smoothed body tone**.

## WHAT IS PELLEFIRM?

PelleFirm™ is an FDA-cleared RF body treatment that revitalizes skin through a combination of deep tissue heating and mechanical massage to temporarily reduce the appearance of cellulite. PelleFirm treatments leave you with smoother skin and an overall healthier appearance from head to toe.

## HOW DOES PELLEFIRM WORK?

PelleFirm is born from the expertise of Pellevé® for skin tightening and delivers deep heating to the lower layers of the skin by applying consistent heat from a handpiece using advanced radiofrequency energy. The unique massaging head on the PelleFirm handpiece aids in the movement of fluids to naturally evacuate from the body in cellulite-prone areas.

## HOW IS PELLEFIRM DIFFERENT THAN SIMILAR DEVICES AND TREATMENTS?

A PelleFirm treatment is comfortable and effective. It requires little to no pre or post-treatment care and can be done immediately before an important event or as a supporting treatment in your overall health regimen.

PelleFirm is a safe and effective solution for patients seeking a non-surgical option to body improvement.

## WHAT SHOULD I EXPECT\*?

Patients describe the treatment as a deep heating sensation coupled with a focused massage. After treatment, most patients feel relaxed and ready to return to normal activity. There is no downtime associated with this procedure and it can be done anytime of the year and in patients of all skin types.

After your initial treatment you may experience an immediate feeling of smoother skin in the treatment area. Treatments usually last an hour and you can return back to normal activity immediately post-treatment. Four to six treatments are recommended to attain your optimal result - a healthier looking body.

Topical anesthetics and cooling devices are not used and your practitioner will review any specific treatment protocols with you.
