

How does Morpheus 8 work and what does it do?

- This FDA-cleared technology uses tiny needles to deliver RF energy deep into your skin, creating micro lesions that trigger your body's natural healing response and promote production of new collagen and elastin, to firm and remodel skin.
- It is more effective than normal Microneedling because the tips have more needles and can penetrate further in the dermis for a more effective treatment
- Radiofrequency heats the tissue up
- It is okay to use in all skin types!
- Although one treatment can provide results, we recommend 3 treatments 4 weeks apart
- Results are permanent but you will continue to age and lose collagen—so we recommend a treatment once a year after your three treatments!
- There are various types of tips that your provider will assess and see which one will best suite your concerns

What does Morpheus 8 treat?

- Scars (improve 30-50% 3 treatments on average)
- Stretch marks (improve 30-50% 3 treatments on average)
- Acne (dries up sebaceous glands)
- Acne scarring (improve 30-50% 3 treatments on average)
- Fine lines/Wrinkles
- Loose skin (laxity)
- Uneven skin texture
- Large pores
- Reduces fat—only on body/under chin/jowls
- Improves hyperpigmentation

Who cannot get Morpheus?

- Patients with pacemaker, defibrillator, or internal devices
- Patients who are pregnant or nursing
- Patients who get keloids
- Superficial filler that is less than 1 year old (deeply placed filler is safe)
- Cannot go over silicone implants
- Have had PDO threads in the last 6 months (can break down the threads, ruin investment)
- Accutane in the last six months
- Retin-A within 3 days of procedure
- No freshly sunbathed skin in last 14 days—must wear sunscreen
- Immunocompromised (very low immune system)

When will I see my results?

- Neocollagenesis (growth of collagen) and elastin growth will usually take 3-4 weeks to begin and will continue for 6 months post treatment

- Results MAY be visible within days, but BEST results are seen 6-8 months after last treatment

What do I have to do before?

- Avoid excessive sun exposure 2 weeks prior
- Wear sunscreen daily
- Stop Retin-A 3 days prior to procedure date
- You can take OTC arnica tablets twice daily 5 days prior to help prevent/treat any bruising (most significant is usually around the eyes)
- Come to the office with a clean face and no make up for your appointment

What happens during treatment?

- Facial cleanse
- We apply prescription strength topical numbing cream and let you relax for one hour
- During the treatment you will be provided the opportunity to use ProNox (laughing gas) for comfort and you can drive ten minutes after discontinued use
- Actual treatment time varies upon area but can take anywhere from 20 minutes to 1 hour

What happens after?

- You will be sent home with Skinceuticals Hydrabalm and we will place on the skin immediately after
- For one to two hours the skin will feel hot like a sunburn
- Cool tap water (2/3) and vinegar (1/3) on gauze or paper towel can cool the skin for comfort/itching
- Occlusive ointment (Hydrabalm by Skinceuticals) will be applied to keep the microscopic holes from the Morpheus treatment closed---YOU WILL NEED TO APPLY FOR NEXT TWO DAYS, TWICE DAILY, cleanse with gentle cleanser
- 2 hours after treatment, clean off Hydrabalm and reapply
- **No make up for 2 days** (microscopic holes open in skin)
- After 3 days—cleanse with gentle cleanser/moisturize (okay to continue Hydrabalm as moisturizer or you can switch)
- 1 week after treatment is okay to restart your normal skincare routine, okay to resume retinoid
- **Redness/swelling/grid marks will subside in 3-5 days**
- **Bruising may be present due to needles**—okay to use arnica topical gel to help with bruising
- **WEAR SPF daily after day 2**, protect face with hat/cover body parts treated for 2 weeks post treatment (unprotected fresh skin can cause issues with pigmentation).

What are the costs?

Area	Single Session	Package of 3
Full Face	\$1200	\$3000 (\$600 savings)
Neck	\$750	\$1800 (\$450 savings)
