

## NOTICE OF CONTACT LENS FITTING FEES

Contact lenses are FDA Class I medical devices that have the potential for serious complications if not used and fitted properly. For that reason, the standard of care and the requirements of the North Carolina State Board of Optometry require an annual examination for a renewal of a contact lens prescription. The contact lens examination is NOT covered by medical insurance, may require a copay determined by your vision insurance carrier, and may only be covered in-part by your vision discount plan. The fee for a contact lens examination starts at \$120 without insurance and varies based on the type of lenses required. These fees will cover any contact lens related follow-up visits for a 60-day period.

By signing, I acknowledge that I understand the policies regarding the contact lens health evaluation and agree to the associated fees. I understand that these fees are an estimate and are subject to changes based on the doctor's final assessment. I also understand that improper usage of contact lenses as prescribed can lead to vision loss and permanent eye damage. I understand that if an infection is present, I will need to be treated under my medical insurance prior to being refit with contact lenses.
